

Mohamed Awad

MERN Stack Developer

Cairo, Egypt | mohamedawadaliawad96@gmail.com | +201284080103
 github.com/MohamedElmealawey  linkedin.com/in/mohamedelmealawey

PROFILE

Experienced Full Stack Developer developing websites and applications using the latest technologies. Proven ability to troubleshoot software issues and create innovative solutions. Full Stack Developer creating and managing frontend and backend applications. Skilled in a wide range of programming languages, databases, and frameworks

EXPERIENCE

Full Stack MERN

Feb 2026 - Apr 2026

[E-commerce app](#) - Remote, Cairo, Egypt

Technologies: React, Node JS

- Built a 6-section responsive e-commerce landing page (hero, products, featured, reviews, newsletter, footer) from scratch using semantic HTML5 and CSS3
- Engineered a custom image carousel in vanilla JavaScript supporting 3 product slides with prev/next navigation and active-state management — no external libraries used
- Implemented an interactive product image switcher across 3 featured items, each with 4 thumbnail previews, reducing clicks needed to view product angles

Full Stack MERN

Nov 2025 - Dec 2025

[Blog App](#) - Remote, Cairo, Egypt

Technologies: React, Node JS

- Built CRUD endpoints for blog posts (Create, Read, Update, Delete) backed by MongoDB + Mongoose, reducing data access code by using schema-level validation
- Implemented JWT-based authentication protecting all write routes (create, edit, delete), ensuring only authorized users can modify content
- Configured CORS middleware to allow seamless communication between the React frontend (port 3000) and Express backend (port 5000) during development

Full-Stack MERN

Jul 2025 - Aug 2025

[Azkar](#) - Remote, Cairo, Egypt

Technologies: React, Node JS

- Architected and deployed a RESTful API with Express.js v5, handling routing, middleware, and structured JSON responses for Islamic Azkar content
- Integrated Mongoose ODM to model and persist data in MongoDB, designing schemas for Azkar categories and entries
- Configured CORS middleware to enable secure cross-origin access for frontend clients
- Deployed the backend serverlessly to Vercel, configuring vercel.json for production routing

Full Stack MERN

Feb 2025 - Mar 2025

[Connect Chat](#) - Remote, Cairo, Egypt

Technologies: React, Node JS

- Developed and implemented webSocket
- simple and easy-to-use API for making HTTP requests
- Tailwind CSS works by scanning all of your HTML files, JavaScript components, and any other templates for class name

EDUCATION

Bachelor of Computer Science (Benha University)

Sep 2020 - Jul 2025

Academic Achievement: Completed coursework in Full Stack MERN

CERTIFICATION

[MERN Stack Development](#)

Apr 2022 - Apr 2022

MaharaTech

- Core Topics: AWS, CI/CD, Infrastructure as Code, Serverless Architecture
- Skills: Terraform, Jenkins, Ansible, Docker Swarm

[Front-End Web Development](#)

Dec 2023 - Dec 2023

Udacity

- Technologies: React, Django, PostgreSQL, Redis
- Concepts: API Design, Data Caching, Horizontal Scaling

SKILLS

Core Technologies: Node.js, React

Frameworks & Libraries: Express, Bootstrap, Tailwind

Databases: MySQL, MongoDB

Tools: VS Code, Postman, Api Dog, MongoDB Shell

Version Control: Git, GitHub

Other Skills: ES6, Redux.js, React Redux, Node Package Manager (NPM)

Soft Skills: Problem Solving & Critical Thinking, Team Collaboration & Communication, Adaptability & Willingness to Learn, Leadership & Decision-Making

LANGUAGES

Arabic (Native), English (Very Good)
